Keyboards that give you information at your fingertips

Suitable for use by patients and hospital staff, the latest improved and upgraded Medi-Key keyboard includes our standard displays to indicate the need for cleaning. This intelligent keyboard's surface has silver-ion antimicrobial technology, helping prevent the spread of bacteria through cross-contamination. Perfect for nurse stations, carts and workstations and for providing quick data entry on the move or for patient interaction.

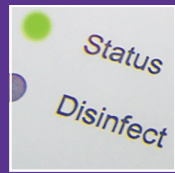

“Looks sleek and professional.
Good infection control
surface, easy to clean, smart
and good to handle.”

UK University Hospital

BRITISH DESIGN

Features providing flexible benefits

Antibacterial

The keyboard is IP65 protected against dust and liquid spills. It is washable and can be sterilised with standard healthcare detergents. The lock and clean function indicator shows when sterilisation is necessary.

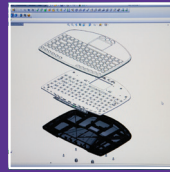

Design Features

Unique gesture control and palm rejection helps provide zoom and scroll quickly and easily. It also includes the intelligent ability to reject or ignore the presence of the palm during use and key functions.

Customisation Options

Compact and space saving, the Medi-Key has a small footprint. With silent 'no-click' and optional backlighting, your keyboard can be customised to your colouring and branding specifications.

OEM Design

Custom and bespoke solutions are available, designs can be configured to suit customer specific requests.

Products designed to fit your healthcare environment

Device Integration

If you already have equipment in your department let us...

- Integrate third party DC powered devices into existing equipment, providing cable-less operation and long term powered mobility
- Add accessories to fit your needs
- Mobilise stationary devices for a flexible environment
- Remove trip hazards with wire-free equipment

Surgical Imaging

Our high quality imaging displays are perfect for...

- Surgical and diagnostic applications with our high resolution display
- Integrated zero wire solutions, removing trip hazards
- We provide OEM compact solutions for existing display equipment

Patient Infotainment

Long or short stay patients benefit from this interactive system providing...

- Access to movies, internet, TV and telephone
- Professional, clinical, patient-centric services
- Clinician and patient interaction, conveying a clear critical pathway throughout their hospital stay

Clinical Workflow

Spend more time with your patients with mobilised clinical information...

- Monitor and record vital patient data through a mobile data entry point
- Bedside patient data entry
- Mobilise your clinical workflow and connect to cloud info quickly
- Computing mobility provides clear benefits to patient workflow and hospital efficiencies

Medication Management

Secure and mobile medication rounds...

- Secure medication dispensing
- Powered mobility of integrated medication systems provides digital data-logging solutions for healthcare staff

Medi-Key

The Medi-Key keyboard is manufactured using hypo-allergenic, latex-free, silicone rubber and is coated to resist chlorine and alcohol-based disinfectants and cleaners. Activating the 'disinfect' mode eliminates the need to switch off the hardware during disinfection. The Medi-Key can be programmed to indicate when cleaning is necessary.

Key Features

- Smooth surface finish for easy to clean keys
- LED indication panel for intelligent disinfect mode
- Silver-ion antimicrobial technology, reduces the threat of cross-contamination
- Ergonomic design
- Wireless option
- Innovative docking system for automatic charging
- Built-in touchpad
- Compatible with common disinfectants

“The disinfect indicator ensures that antibacterial standards are monitored.”
