iBoot-G2S

Reboots the failed system to get you back online fast!

Easiest Way to Minimize Downtime

Minimize downtime to keep your critical systems running and your customers happy. iBoot provides automatic and web controlled power switching to quickly get you back online fast.

This model has a built-in 10/100 network switch that makes installation in those hard to reach locations a breeze. With this product, there is no need for a separate cable run or router port to get the cost savings of remote reboot. If you are looking for a basic product with a limited amount of features, please check out the *iBoot-G2*.

Control one or many iBoots with a single sign-on using the free iBoot Cloud Service. Just log in and you are instantly in control of as many locations as necessary.

Top Features:

Simple Web Browser Operation

Just point your browser to the iBoot, login and you are one click away from bringing that failed system back to life

All setup functions are easy to configure from the browser

Free Cloud Service

Manage an unlimited number of iBoots from a single login
